FUTURE MADE IN AUSTRALIA

A Future Made in Australia

Our plan to make Australia stronger

Easy Read version

How to use this fact sheet

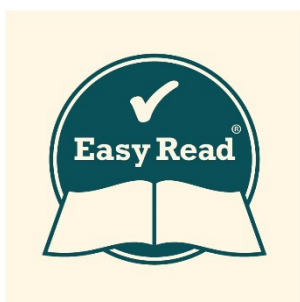

We are the Australian Government.

We wrote this fact sheet.

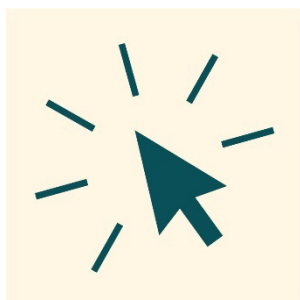

You can ask someone you trust for support to:

- read this fact sheet
- find more information.

This is an Easy Read summary of another fact sheet.

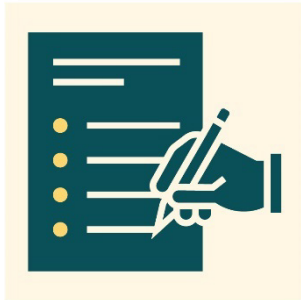

It only includes the most important information.

You can find the other fact sheet on our website.

www.futuremadeinaustralia.gov.au

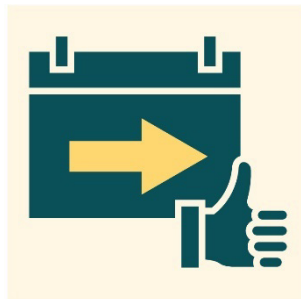

About the plan

We made a plan called a Future Made in Australia.

In this fact sheet, we call it the plan.

The plan is about how we want to make Australia's **economy** better in the future.

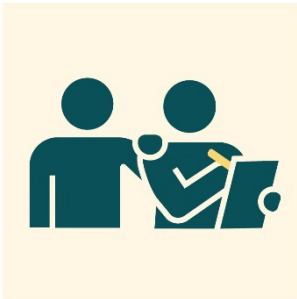

Our economy is all the goods, services and money that Australia makes and uses.

The plan will help us achieve our goals to:

- create new jobs

- support businesses

- make more things here

- support people to learn new skills.

Programs in the plan

The plan will give money to programs that support the Australian economy.

We explain some of these programs below.

New Energy Apprenticeships

New Energy Apprenticeships is a program to support more jobs in **clean energy**.

Clean energy is power made in a way that is better for the environment.

This program helps pay for people to learn how to do certain jobs that support clean energy.

The program also gives support like:

- money for some areas of study and businesses
- helpful services for people doing **apprenticeships.**

An apprenticeship is when you learn how to do a job while you are at work.

Building Women's Careers

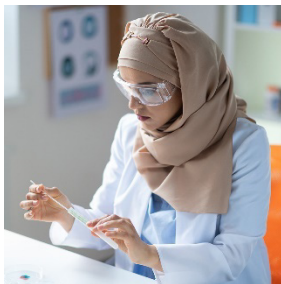

Building Women's Careers is a program that supports women to access training and jobs that men usually do.

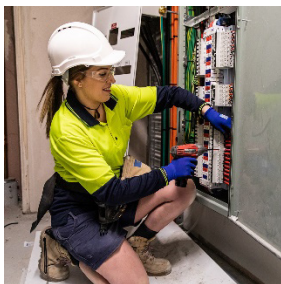

For example:

- a builder

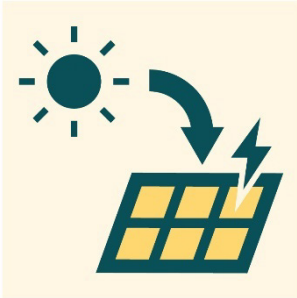

- a scientist

- an electrician.

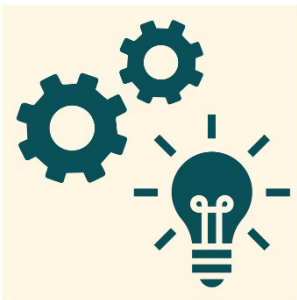

Solar Sunshot

Solar Sunshot is a program that supports **solar power** businesses.

Solar power is when you use sun light to make electricity.

The program will:

- improve technology to make better solar power parts

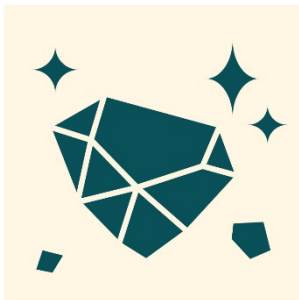

- find new ways to make new solar power parts.

Resourcing Australia's Prosperity

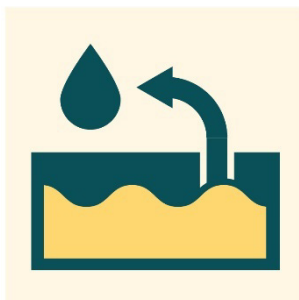

Resourcing Australia's Prosperity is a program that looks for resources in nature we can use for clean energy.

For example, different types of minerals called:

- lithium
- cobalt
- copper.

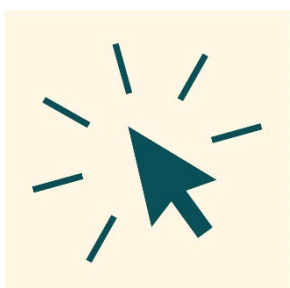

The program also looks for underground water.

Find out more about the plan

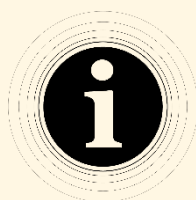

The plan will help create a better future for communities and businesses in Australia.

You can find out more about how the plan could help you on our website.
